

## Alncom Success Story – Ellingham Full Fibre

Half of the village of Ellingham has Fibre to the Cabinet (FTTC) connections but, as is so typical in rural areas, the other half, and most of the surrounding area, had to rely on antiquated copper connections resulting in painfully slow broadband speed.

Alncom were contacted by the residents following the frustration of a failed and lengthy community fibre project. There had been many, many months of a major Network Provider talking about what they **might** have been able to do and asking for commitment from residents, but, eventually, it was deemed too costly to proceed.

Alncom quickly established that the project would be viable, and our local knowledge meant that we were able to design a solution within days. The project included approximately 11 kms of full fibre cable to build a new network which includes Ellingham, Newham Village, Newham Hall, and business's in Coldrife and West Fleetham.

Our team commenced work almost immediately and, from inception, we had live Ultrafast fibre connections around this extremely rural area within 4 weeks!

The whole network was fully funded by vouchers from both the **Gigabit Broadband Voucher Scheme (GBVS)** and the **Borderland's Top Up Scheme** resulting in zero cost to the residents who now enjoy gigabit capable broadband speeds. The most popular package is 100mbps unlimited for £24.99 - a massive improvement over their original sub 1mbps copper connections!

Yet again, Alncom prove that we don't just sit and talk about what we are going to do – **we Get it Done!**
