

Alncom Success Story – Falldon Full Fibre

This beautiful part of the county, with a wide mix of residential properties and business's, suffered from slow broadband speeds and, as a direct result of our sales team's efforts, Alncom were asked to be involved. It was not just the farming community that were suffering though. This area is also home to an eclectic mix of businesses from Bed & Breakfasts to a home crafting supplier and even a Milliners!

With three separate land owners included in the project, we were able to utilise access to their land to build our own full fibre infrastructure connecting properties with over 10Kms of fibre.

Within 3 weeks of establishing the demand for faster internet, Alncom had 'spades in the ground' and a week later the first actual Ultrafast connection was made. The whole project was completed in 6 weeks and the cost of installation was fully covered by the [Government's Gigabit Broadband Voucher Scheme \(GBVS\)](#) and the [Borderland's Top Up Scheme](#).

This is typical of Alncom's '[Get it Done](#)' ethos.

When asked to comment, Harry Baker Creswell, landowner at Chathill said:

"This is about giving us country folk the same opportunity as city and town dwellers. We have holiday cottages and many homes and businesses here and plans for Preston Towers to become a wedding venue. Personally, I am so grateful that Alncom are local and have helped our economy and community where all other network providers have failed"
