

Incom Success Story

Ingram Valley Full Fibre

The village of Ingram was originally part of a Community Fibre Project and then, after completing the two villages at the start of the project, Ingram was de-scoped & left with no hope of receiving fibre broadband!

Incom were contacted and, with their ethos of 'Get it Done', leapt into action. There were thirty properties that were desperate for a decent broadband connection so, working closely with the Parish Council and land owners, they completed the planning and were able to get live connections very quickly. Local knowledge and a highly skilled technical team meant that making connections, in what has to be one of the most remote valleys in the country, was achievable with great speed and efficiency.

The whole network was fully funded by vouchers from both the **Gigabit Broadband Voucher Scheme (GBVS)** and the **Borderland's Top Up Scheme** resulting in zero cost to the residents who now enjoy gigabit capable broadband speeds. The most popular package is 100mbps unlimited for £24.99 per month.

It's always a pleasure to receive such positive feedback:

"Just wanted to say thank you to all at Incom who have been working in the valley to provide the new broadband supply to our community. Your team were very professional when entering my cottage and helpful in answering any questions I had. Thanks also for making such little disturbance over my paddock land. It needs rolling but that will have to wait a while till its dry....which could be a while!"

"Thanks to you all again"
